NXJ APPLICATION

NXJ tension clamp is applicable for aerial lines up to 10kV and below overhead transmission lines. NXJ can fix insulated aluminum wire on the insulator at the corner or terminal tensile pole in order to anchoring and tightening aerial cables.

4F, Yindong Plaza, No.58 Xinjinqiao RD., Pudong New Area, Shanghai 201206, China Tel: +86-21-6165 6998 Fax: +86-21-6165 6995

NXJ DESIGN

NXJ clamp body is casted of high strengthen and corrosion resistant aluminum alloy. Wedges are made of weather resistant and anti-UV material with high mechanical strength. NXJ/L clamp hook is made by steel wire with hot galvanizing.

Installation as below:

Key Feature:

- 1. No need stripping of cable insulation
- 2. No loose part during installation
- 3. Easy and efficient installation
- 4. Long service life
